

PHARMACY TECHNICIANS UNIVERSITY

PTU ELITE: POINT-OF-CARE TESTING

Equip your pharmacy technicians to maximize pharmacy efficiency, build valued relationships, and improve patient health. Choose TRC Healthcare to help pharmacy technicians achieve complete competence with point-of-care testing.

PTU Elite: Point-of-Care Testing is a comprehensive training course that prepares pharmacy technicians to perform point-of-care tests in pharmacies that obtain (or have) a CLIA waiver. This 10-hour online course gives your pharmacy technicians total mastery of the necessary skills to:

- Identify candidates for testing
- Administer and process tests safely
- Perform vital administrative tasks

KEY BENEFITS

- * **Leverage maximum efficiency.** Successful pharmacies augment access to healthcare in their communities by training all staff members, including pharmacy technicians, for optimal performance and results.
- * **Increase revenue streams.** Customers who choose to have tests performed in your pharmacy may spend more time in your store and increase sales.
- * **Elevate customer satisfaction and loyalty.** Trained pharmacy technicians have meaningful conversations with customers about routine, sometimes spontaneous tests that can be done at your pharmacy.
- * **Improve public health.** Your pharmacy technicians add value by helping the healthcare team detect disease and refer patients to their primary care provider for treatment.

What to Expect of PTU Elite: Point-of-Care Testing

TRC Healthcare gives pharmacies convenient, efficient, and cost-effective access to a high standard of training for pharmacy technicians who will perform point-of-care testing. We reduce the work for busy pharmacists who supervise training for pharmacy technicians.

After completing our course, your pharmacy technicians are ready to administer CLIA-waived tests that screen, detect, and/or monitor conditions such as diabetes, high cholesterol, COVID-19, flu, hepatitis C, human immunodeficiency virus (HIV), and strep throat.

Designed by Pharmacy Teams for Pharmacy Technicians

We asked pharmacy teams what they expect from training that prepares pharmacy technicians to perform point-of-care testing and designed a program around their expressed needs. When you choose PTU Elite: Point-of-Care Testing, you will find everything pharmacies expect in a training program.

- **Convenience.** Ten hours of self-paced, online study, available to staff 24/7, accompanied by clinical resources, quizzes, exercises, and ready-made rubrics that help supervising pharmacists confirm skills.
- **Engagement.** Immersive videos, problem-solving scenarios, patient cases, and simulated practice keep students engaged in teaching points.
- **Affordability.** Variable pricing, adjusted for the size of your organization, whether you have just a few local sites or numerous pharmacies nationwide.
- **Practicality.** Technicians learn to take vitals and collect nasal swabs, throat samples, fingerstick blood samples, and oral fluid samples. They become proficient with administrative tasks that accompany point-of-care testing.

TRC Healthcare is a trusted leader in training and continuing education for pharmacy technicians. You can depend on us to deliver relevant content and keep it updated to the latest standards.

Retain the Best Pharmacy Technicians Through Career Development

PTU Elite: Point-of-Care Testing is part of a comprehensive curriculum that gives experienced pharmacy technicians access to continuing education and professional development courses.
